

Bug Shot™

Environmentally Friendly

Don't just kill a few adults.

Bug Shot™ kills adults, larva and eggs

Use Bug Shot for long term control

HELP STOP THE SPREAD OF DISEASE

Bug Shot™ is an effective all natural and organic mixture of water-soluble compounds formulated to control hard shelled insect populations. Ideally suited for the control of insects such as the Darkling Beetle and cockroaches, Bug Shot™ controls populations by killing all stages of insect development. Bug Shot™ is a contact insecticide that can be safely applied in both indoor and outdoor areas offering proven long term control with the highest safety features available.

Ideally suited for all warehouse, storage, packaging, feed or food preparation areas.

- Will not mark or stain
- No residual contamination
- No run off water restrictions
- Lasting, safe & effective control

Darkling Beetle	Field Trial Results	Georgia, USA	2008
7 Traps per House	Treatment	Average Adults 35 days after treatment	Average Larvae 35 days after treatment
House #1	Control - None	494	591
House #2	Control - None	412	636
House #3	Control - None	437	605
House #4	Bug Shot	0.86	1.28
House #5	Bug Shot	0.89	1.02
